

collecting information at a first computer system;

organizing said information into a plurality of first web-sites, each of said first web-sites being addressable by a unique Universal Resource Locator (URL) and each of said first web-sites being identified by a physical location;

assigning one of said first web-sites to a user as a user web-site; and

selecting links to a plurality of said first web-sites for presentation on said user web-site based on a relationship between the physical locations identified by said first web-sites and the physical location identified by said user web-site.

---

16. (Twice Amended) A method of providing information to a user comprising:

collecting information at a first computer system;

organizing said information into a plurality of first web-sites, each of said first web-sites being addressable by a unique Universal Resource Locator (URL) and each of said first web-sites being identified by a physical location;

assigning one of said first web-sites to a user as a user web-site;

selecting links to a plurality of said first web-sites for presentation on said user web-site based on a relationship between the physical locations identified by said first web-sites and the physical location identified by said user web-site; and

accessing said user web-site by a second user.

17. (Twice Amended) A system for providing information to a user comprising:

a first computer system adapted to collect information and organize said information into a plurality of first web-sites, each of said first web-sites being addressable by a Universal Resource Locator (URL) and each of said first web-sites being identified by a physical location, said first computer system further adapted to assign one of said first web-sites to a user as a user web-site and present links to a plurality of said first web-sites on said user web-site based on a relationship between the physical locations identified by said first web-sites and the physical location identified by said user web-site.
